SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be observed, including the following:

- Read all instructions.
- Check that the mains voltage corresponds with the rating on the appliance.
- This appliance must be positioned upright on the floor away from curtains, furniture or wall coverings and other flammable items.
- The appliance must not be left unattended while it is connected to the mains supply.
- Do not touch hot surfaces. Use the handle or the controls.
- To protect against electrical shock do not immerse cord, plug, or appliance in water or other liquid. Do not operate with wet hands.
- Do not let the cord hang over the edge of a worktop, table etc. or touch hot surfaces.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or is dropped or damaged in any manner. The supply cord cannot be replaced. If the cord is damaged the appliance should be scrapped.
- The use of accessory attachments not recommended by the appliance manufacturer may cause fire, electric shock or injury.
- This appliance must not be immersed in any liquid
- To disconnect remove the plug from the mains outlet. Do not pull the plug out by the cord.

SAFETY INSTRUCTIONS

- Never remove parts from the appliance, such as the feet, screws and so on.
- Never use the appliance near a bath, shower or a swimming pool.
- Never place flammable objects or clothing on top of the appliance.
- Allow a 100cm safe area around the appliance on all sides.
- Never use the appliance in a room with explosive gas such as petrol, or while using any kinds of flammable glues, sprays or solvents.
- Do not place any part of your body near the air inlet, outlet or on the fins ,to avoid personal injury, electric shock or fire.
- If overheating should occur, the built-in overheating safety device will shut the appliance off.
- Prevent overheating of the appliance by keeping the air inlets and outlets clean and free of anything that may cause blockage. Check all inlets and outlets regularly for accumulated dust.
- **DO NOT COVER.**
- **CAUTION:** Some parts of this product can become very hot and cause burns. Particular attention must be given when children and vulnerable people are present.
- Do not insert any foreign objects into the grill.
- Keep all grills clear of any draped fabric or curtains.
- The appliance must not be located immediately below a mains socket. Do not use the appliance with a programmer, timer or any other device that switches the appliance on automatically. A fire risk exists if the appliance is covered or positioned incorrectly.
- Do not operate this appliance for any thing other than its intended use.
- This appliance is not intended for commercial use
- **This product is intended for household use only.** Do not use outdoors.

SAFETY INSTRUCTIONS

- This product is only intended for heating.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Use this heater on a horizontal and stable surface.
- **WARNING:** Do not use this heater in small rooms when they are occupied by persons not capable of leaving the room on their own, unless constant supervision is provided.
- **WARNING:** To reduce the risk of fire, keep textiles, curtains, or any other flammable material a minimum distance of 1 m from the air outlet.
- **WARNING:** It is hazardous for anyone other than a competent person to carry out any service or repair operation which involves the removal of a cover which gives protection against exposure to electrical parts.
- **WARNING:** Children of less than 3 years should be kept away unless continuously supervised.
- Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance.
- **WARNING:** In order to avoid overheating, do not cover the heater

SAFETY INSTRUCTIONS

- **WARNING:** This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to make sure that they do not play with or use the appliance.

Electrical Safety

THIS APPLIANCE MUST BE PLUGGED INTO AN EARTHED SOCKET

- Before switching on, make sure that the voltage of your electricity supply is the same as that indicated on the rating plate. This product is designed to operate on 220 - 240V AC 50-60Hz. Connection to any other power source may damage the unit.
- This product may be fitted with a non-rewireable plug. If it is necessary to change the fuse in the plug, the fuse cover must be refitted. If the fuse cover becomes lost or damaged, the plug must not be used until a suitable replacement is obtained.
- If the plug needs to be changed because it is not suitable for your socket, or becomes damaged in any way, it should be cut off and an appropriate plug fitted. This should be carried out by a qualified electrician. The plug removed must be disposed of safely, as insertion into a 13 Amp socket is likely to cause an electrical hazard.

This symbol means DO NOT COVER:

BASE ASSEMBLY

Before using the heater, the feet must be fitted to the unit. These are to be attached to the base of the heater using the 2 screws provided. Carefully lie the heater on its side, clip on the feet and secure by inserting the screws, taking care to ensure that they are located correctly in the bottom ends of the plastic mouldings.

CONTROL PANEL

- A. LED display
- B. Power on/standby button
- C. Mode selection button
- D. Temperature/timer increase button
- E. Temperature/timer decrease button
- F. Fan button
- G. Timer button

OPERATIONS AND FUNCTIONS

Before connecting your appliance to the mains socket, position the appliance upright on the floor, at least 100cm away from the wall, curtains, furniture or wall coverings.

Insert the mains plug into a suitable wall mains socket. Then use the “**Power Switch**” to turn on the unit. The unit will then enter standby mode, as shown by the “**Power On/Standby**” and “**Timer**” button lowly lit. Your heater is now ready for use.

Power On/Standby Button

- Press the “**Power On/Standby**” button on the appliance once to turn the heater on with default settings: High mode and a temperature setting of 24°C
- Press the “**Power On/Standby**” button again to put the heater into standby mode.

Mode Button

- When the unit is on, repeatedly press the “**Mode**” button on the appliance to cycle through the modes: High (3) (2000W) -> Medium (2) (1200W) -> Low (1) (800W).
- Once the mode has been set, the “**Mode**” button on the control panel will be illuminated. After 5 seconds the display will change from the mode (3,2,1) back to the temperature.
- The temperature can be set and adjusted in all modes.
- When the set temperature is reached, heater will stop working. When the ambient temperature is lower than the set temperature, the heater will start working again.

OPERATIONS AND FUNCTIONS

Fan Button

- When the unit is on, press the “**Fan**” button on the appliance.
- The “**Fan**” indicator will illuminate and the fan will operate.
- Press the “**Fan**” button on the appliance again and the fan and the fan indicator on the appliance will turn off.

Adjustment Buttons

- When the unit is on and the mode button has been pressed, press the “+” or “-” buttons on the appliance to adjust the temperature. If you rapidly press the “+” or “-” buttons, the temperature will change rapidly.
- Use the “+” or “-” buttons on the appliance to adjust the temperature from 7°C to 35°C in 1°C increments.
- After 5 seconds of inactivity the temperature will be set;
- When the unit is on, press and hold the “+” and “-” buttons for 5 seconds to change the temperature mode from Celsius to Fahrenheit. Repeat this to change the temperature mode from Fahrenheit to Celsius.
- Please note that in Fahrenheit mode, the default temperature will be 75°F and the setting range is 45°F - 95°F.
- The adjustment buttons can also be used to adjust the timer, as described below.

OPERATIONS AND FUNCTIONS

Timer Button

- When the power is on, you can schedule to shut off the heater, or when in standby mode you can schedule to turn on the heater.
- To schedule the heater to turn on after a number of hours have passed, follow the below instructions while in standby mode. To schedule the heater to turn off after a number of hours have passed, follow the below instructions while the power is on.
- To set press the “**Timer**” button; the “**Timer**”, “+” and “-” buttons will now illuminate.
- Use the “+” or “-” buttons on the appliance to adjust the hours on the timer. The timer will cycle through 0, 1, 2... up to 24 hours. If you rapidly press or hold down the “+” or “-” buttons, the temperature will change rapidly.
- After 5 seconds of inactivity the timer will be set; alternatively, once you have selected your required time press the “**Timer**” button again to confirm. The “**Timer**” button will now remain illuminated until the timer is up.
- If “0” hours is selected then the timing indicator will remain dimly lit, as before.
- The display will show the selected timer length for 5 seconds after confirmation. The display will then change back to the temperature.
- If you would like to see the remaining time after the timer has been set, press the “**Timer**” button again. The “+” or “-” buttons on the appliance can now be used to adjust the timer again if required.

OPERATIONS AND FUNCTIONS

- When the time is up, the appliance will automatically stop running if set when power was on, or the appliance will automatically start running if set when in standby mode.
- **NOTE:** The heater must remain plugged in for this function to work, and the power switch on the side of the unit must be turned on for the product to operate.

PLEASE NOTE: Once the appliance has been plugged into the mains, if there is no operation within 3 minutes. The unit will then enter standby mode, as shown by the “**Power On/Standby**” and “**Timer**” button lowly lit.

Other Functions

Memory Function - If the heater is turned off then on again using the “**Power On/Standby**” button on the appliance, it will resume operation in the mode it was in before it was turned off. If the heater is turned off using the “**Power Switch**” or unplugged then plugged back in again, it will default to the original settings.

Tip-Over Protection - When the heater is tipped over, the heater will automatically shut off. Place the heater on a flat, level, and stable surface and turn the heater on again.

Overheat Protection - Overheat protection - the power to the heating elements will automatically cut off if the temperature of the heating elements exceeds a certain limit. In the event of overheating, the heater will stop operating. Once the appliance has completely cooled the appliance will then resume operating as normal.

CLEANING AND CARE

WARNING: Electrical Shock Hazard.

Before you clean the appliance, disconnect the mains plug from the wall socket.

- Allow the appliance to cool down completely before cleaning.
- Do not immerse cord, plug or appliance in any liquid or allow moisture to come into contact with electrical parts.
- Clean the outer surface using a moist cloth and wipe over with a dry, soft cloth.
- Do not use harsh detergents, abrasives or spray on cleaners.
- Don't allow water to seep into the openings or come into contact with electrical connections.
- Allow sufficient drying time before operating again.
- Clean the air inlets and outlets regularly with a vacuum cleaner using the brush attachment (with regular use, at least twice a year).
- When the appliance is not in use. We recommend that, the heater is re-packed in its original packaging and stored in a cool, dry place.

PROBLEM SOLVING

My appliance does not work when I turn it on:

1. Check that your appliance is plugged in and the power is turned on at the mains socket.
2. Try another mains socket.
3. Check the appliance is in an upright position.
4. Check that the heat and temperature setting has not been set too low.
5. If the appliance still doesn't work, do not try to repair it yourself.
6. Check the timer setting (if your model has a timer).

If your appliance power is automatically cut off, follow the step below:

1. Unplug your appliance from the mains socket and allow it to completely cool down.
2. Inspect your appliance. Clean the air inlet and air outlet with a vacuum cleaner if necessary. If there are any signs of physical damage (e.g. melting, or burning of the case), do not attempt to use the appliance. Please leave all maintenance work to qualified personnel.
3. Plug in the appliance and switch it on again. If it cuts off again, move the appliance to a better ventilated location.

If your appliance shows the error code “EH” or “EL”, follow the steps below:

1. Turn the appliance off at the mains.
2. Turn the power back on. If the fault persists contact customer services.

GUARANTEE AND CUSTOMER SERVICES

This product is guaranteed for **12 months** from the date of the original purchase. If any defect arises due to faulty materials or workmanship, the faulty product must be returned to the place of purchase. Refund or replacement is at the discretion of the retailer.

The following conditions apply:

- The product must be returned to the retailer with the original proof of purchase.
- The product must be installed and used in accordance with the instructions contained in this instruction guide and any other instructions for use which are supplied.
- It must be used for domestic purposes only and for its intended use.
- This warranty does not cover wear and tear, damage, misuse or consumable parts.

This does not affect your statutory rights.

Feet and screws

CONNECTION TO THE MAINS SUPPLY

This appliance is designed to operate from a mains supply of 220-240V~50-60Hz.

Check that the voltage marked on the product corresponds with your supply voltage.

How to change the fuse

1. Slot the end of a screwdriver into the recess in the fuse holder of the plug.
2. Pull the fuse holder upwards until free of the plug and slide the fuse out.
3. Replace the fuse and replace fuse holder, pushing down until locked into place.

Important: Only ever use a BS1362 fuse with the same rating marked on the non-rewirable plug.
